

## HELICOBACTER PYLORI TREATMENT #3

Take the following medications four times per day:

### Morning:

- 1 – Omeprazole 40 mg
- 2 – Pepto Bismo 262 mg tablet
- 1 – Flagyl 500 mg

### Afternoon:

- 2 – Pepto Bismo 262 mg tablet
- 1 – Flagyl 500 mg

### Late Afternoon:

- 2 – Pepto Bismo 262 mg tablet
- 1 – Flagyl 500 mg

Before Bed time:

- 1 – Omeprazole 40 mg
- 2 – Pepto Bismo 262 mg tablet
- 1 – Flagyl 500 mg
- 1 – Doxycycline monohydrate 100 mg tablet

This treatment is for **14 days**. Please **DO NOT** skip any doses.

After treatment, please wait 10 days to do the H. pylori breath test. DO NOT take any PPI (example: omeprazole, pantoprazole, protonix, prilosec,...) during these 10 days.

Please feel free to call us to set an appointment after treatment or if you have any questions.

Thank you!
